No. 1.—The following resolution of the Government of India is republished :—

HOME DEPARTMENT.

POLITICAL.

Delhi, the 15th December 1914.

Nos. 2851—2864.

RESOLUTION.—In supersession of the orders contained in the Resolution of the Government of India in the Home Department, No. 2831-2842, dated the 8th December 1892, the Governor-General in Council is pleased to issue the following instructions with regard to certificates of identity.

2. Every native of India who contemplates proceeding out of India to foreign countries is strongly urged before leaving, to furnish himself with an authoritative certificate of identity, in the form appended to this Resolution, signed by the head of the district (in a Presidency Town and in the town of Rangoon, the Commissioner of Police) in the case of residents of British India, and by the Political Officer in that of residents of Native States. In the case of a student the certificate should be signed by the head of his last school or college and countersigned by the District Officer (in a Presidency Town and in the town of Rangoon, the Commissioner of Police) or Political Officer as the case may be.

Appeals for assistance by destitute Indians who desire repatriation and by students who, owing to embarrassed circumstances, are unable to complete their course of education cannot be dealt with satisfactorily unless the parties are in a position to produce evidence of identity. The possession of a certificate of identity will be specially useful to young men of good family, as it may enable the Secretary of State to obtain for them social and other attentions.

Those who are desirous, however, of travelling in countries where a passport will be necessary are advised to furnish themselves with such a document also before leaving India, in lieu of, or in addition to, a certificate of identity. It should be remembered that no person is entitled to a passport, as of right, on the ground that he is a British subject, and the production before authorities outside India of a certificate of identity, unless supplemented by documentary evidence of respectability is not sufficient to ensure that a passport will be granted.

Form of Certificate of Identity.

1. Name of applicant_____
2. Father's name and caste_____
3. Residence_____
4. Age of applicant_____
5. * Nationality of applicant_____
6. Social or pecuniary status of father (or guardian)_____
7. Date of probable departure of applicant from India_____
8. Object of applicant's visit to England (Europe)_____

Signature of District Officer (in a Presidency Town, the Commissioner of Police) or Political Officer, or head of school or college †

*Dated*_____

* *I.e.*, whether a British subject by birth or by nature (as a subject of a Native State).

† Countersignature of the District or Political Officer should be obtained on certificates signed by heads of schools or colleges.

NOTE.—Holders of certificates of identity intending to apply subsequently in England or elsewhere for a passport to visit a foreign country are warned that no person is entitled to a passport as of right on the sole ground that he is a British subject. The production of a certificate of identity, therefore, will not ordinarily be sufficient to secure the grant of a passport, unless it is supplemented by documentary evidence of respectability, endorsed by a Local Government or other authority competent to issue passports in India, certifying that the holder is a fit and proper person to receive a passport.

Fort St. George, December 2, 1916.

No. 2.—It is hereby notified that, in addition to the Secretary to the Government of Madras, Home Department, the Government of India have been pleased to empower the Collector of Madras to grant and sign passports in the name of the Viceroy and Governor-General of India, while the headquarters of the Government are at Cotacamund. British subjects, Indian or European, and subjects of Native States in subordinate alliance with the British Government, intending to travel to places outside the Indian Empire, may apply for passports either to the Collector of Madras, or to the Secretary to the Government, Home Department, either through the Commissioner of Police, Madras, or through a District Magistrate, or through the Resident in Travancore and Cochin, as the case may be.

No. 6.—Under clause (*n*) of sub-section (1) of section 250 of the Madras District Municipalities Act, 1884, the Governor in Council is pleased to issue the following rules for regulating schemes for the extension of towns undertaken by municipal councils and building operations within the same, in lieu of those published on pages 505 and 506 of Part I-A of the *Fort St. George Gazette*, dated 26th August 1913, and page 253 of Part I-A of the *Fort St. George Gazette*, dated 7th April 1914:—

RULES.

(1) *Provision of accommodation to precede eviction.*—When the opening up of a congested area in any municipality involves the eviction of any of the inhabitants suitable sites for house building or houses wherever possible shall be offered elsewhere to the inhabitants in partial or full compensation for the property acquired.

(2) *Selection of sites.*—In selecting a site for an extension, the following considerations should be kept in view:—

(*a*) It should be accessible and convenient to the people concerned;

(*b*) it should be adequate in extent, allowing space for all the requirements of a suitable lay-out as defined in rule (3), and where possible for future expansion;

(*c*) where possible, it should be elevated and open and should have a sufficient slope for proper drainage;

(*d*) the sub-soil should be as pervious as possible, gravel, sand or light loam being referred to clayey soils, and the sub-soil water should not rise too close to the surface.

(3) *Laying out the site.*—In laying out the site, the following matters should be provided for:—

(*a*) Main and secondary streets and their connection with those of the parent town;

(*b*) the reservation of suitable open spaces and of sites for any buildings that are likely to be required for the convenience of the public or any section thereof;

(*c*) public latrines; these should be as unobtrusive as possible, consistently with convenience;

(*d*) public wells, where no piped water-supply is available; these should be remote from cesspits or other sources of contamination; and

(*e*) sub-division, where necessary, into separate blocks suitable for people of different occupations or classes.

The provision of streets, drains, wells and latrines should ordinarily be put in hand concurrently with the development of the site.

(4) *Streets.*—The minimum width for main streets should ordinarily be 40 feet exclusive of lateral drains. A suitable width for secondary streets is 30 feet. The roadway should be metalled at least to the extent of half its width. Provision should be made for avenue trees at the sides. Storm-water drains of oval section should ordinarily be provided at the sides. Cross streets should be provided at intervals of not more than 660 feet.

(5) *Conservancy lanes.*—Ordinarily conservancy lanes 10 feet in width exclusive of lateral drains should be formed along the backs of houses to enable the conservancy carts and scavengers to enter for the purpose of cleaning backyards and for the laying of drainage pipes

in the event of the town being provided with underground drainage. In the case of houses with gardens, however, provision may be made for giving the sweeper access from the main street along the side of the compound. Conservancy lanes also must be provided with side drains of oval section.

(6) *Plotting of sites*.—After making provision as above the remainder of the land available should be plotted into house-sites. In plotting house-sites, the means and occupations of the people to be provided for, must be considered; a site of 2,400 square feet should ordinarily be the maximum. It is unnecessary to aim at rigid uniformity of size or shape if more convenient plots can be secured otherwise. The average size may also reasonably be different for main and minor streets.

(7) *Disposal of house-sites*.—House-sites disposed of by municipal councils should ordinarily be sold by auction which may be open to the public generally or confined to the members of the caste or castes for which the particular extension is intended.

(8) *Application to build*.—Within six months of the completion of the sale, the application for construction must be made.

Every application to construct, reconstruct, or extend a building shall, in addition to the particulars required by section 180 of the District Municipalities Act, be accompanied by—

(*a*) *Site plan*—a site plan in duplicate drawn to a scale of not less than one inch to thirty-three feet showing—

(i) the boundaries of the site and, if the locality has been surveyed, the number of the survey field or sub-division in which it stands;

(ii) the name or description and the width of every street adjoining the site, and the position and use of adjacent buildings;

(iii) the area to be occupied by the proposed building;

(iv) in the case of an extension, the nature and use of all existing buildings on the site and the relative position of the existing and proposed building;

(v) the nature of the ground on which the proposed building is to be erected, whether made or natural, whether rocky, clayey, gravelly, sandy or mixed as the case may be; and in the case of made ground, the time when it was so made and the materials used in making it; and

(vi) the position and dimensions of proposed latrines, urinals, drains, cess-pools, stables, cattle-sheds, cow-houses, wells and other appurtenances of the building;

Provided that if the estimated cost of the construction, reconstruction or extension is Rs. 100 or less, it shall be sufficient for the site plan to show, without scale the size of the proposed building and its position on the land, and the position of the land with reference to adjacent buildings or lands.

(*b*) *Plan of proposed building*—a plan of the proposed building in duplicate, drawn to a scale of not less than one-eighth of an inch to a foot showing—

(i) the plan of each floor with sections and elevations in the same scale;

(ii) the levels of the foundation and lowest floor or plinth, with reference to the level of the principal adjacent street and the level of the site;

(iii) the depth and thickness of foundations;

(iv) the height and thickness of the plinth or basement walls, and of the walls above;

(v) the thickness of the floor or floors and the dimensions and structure of the roof;

(vi) the number of doors, gates, or windows to be constructed, with an indication as to which of them open outwards on any street.

(*c*) *Specification*—a specification showing—

(i) the method of construction and the nature and description of the materials to be used including the dimensions of all beams, posts, pillars and columns;

(ii) the manner in which the surface drainage of the land will be disposed of;

(iii) the means of access to latrines for scavengers;

(iv) if the building is intended to be used as a dwelling house for two or more families, or as a place for carrying on any trade or business in which more than twenty persons may be employed, or as a place of public resort, the means of ingress and egress.

Provided that clauses (*b*) and (*c*) above shall not apply to buildings of an estimated cost of Rs. 500 or less.

(*d*) *Application for permission to cover side drain*—if it is proposed to place a covering over the side drain to give access to the house a separate application to the Municipal Council to erect such covering.

N.B.—If it is intended to use the building or part thereof for any of the offensive or dangerous trades specified in section 113 of the District Municipalities Act or as a factory, stable, cattle-shed or cow-house or as a place for the housing of goats, pigs, sheep or poultry, the fact must be expressly stated.

(9) *Plan to be approved*.—Construction shall not be commenced until the plan of the building has been approved or unless the time limit fixed by section 180 of the District Municipalities Act has expired and the Municipal Council has passed no orders granting or refusing a license.

(10) *Time limit for building*.—In the absence of orders of the Municipal Council to the contrary construction must be completed within 18 months of the date from which commencement is permissible under the preceding rule.

(11) *Only one house may be built on each site*.—No more than one dwelling house shall be built on any one site nor shall any site be sub-divided.

(12) *Houses to face the street*.—When the houses are contiguous, each house should directly face the street. It shall not be permissible to construct a building for separate occupation without exclusive access to the same from a public street.

If it is desired to erect such a building on an area not contiguous to an existing public street, a road shall be laid out to give access to it of such a width and construction as the Municipal Council shall approve.

(13) *Area to be covered by buildings.*—There shall be in the rear of every domestic building an open space of at least 10 feet extending along the entire width of the building and belonging exclusively to the building unless the back of the building abuts on an open square or the like of not less than 20 feet in width which is dedicated to public use and is consequently not likely to be built upon. Where, however, the site is of such a nature that it is impracticable to provide an open space as prescribed above, the Municipal Council may relax the rule to such extent as may be necessary, but in no case shall the area occupied by masonry buildings or verandahs exceed two-thirds of, and in the case of buildings of two or more floors, one-half of, the total area of the site.

In the case of existing premises which it is proposed to rebuild and which do not at present comply with this rule, it shall be permissible to vary the proportion and position of open space—but unless this rule is complied with no increase in the total cubic contents of the building will be permitted.

(14) *Back to back houses prohibited.*—The construction of houses back to back with no intervening space is prohibited.

(15) *Circumstances in which thatch is allowed.*—No house or out-house shall be constructed with thatch except in special localities selected by the Municipal Council with the approval of the Collector.

(16) *Ventilation.*—The Municipal Council shall require such provision for ventilation as it may consider proper with reference to the circumstances of each case. Ordinarily the doors and windows opening into the external air of every room in a domestic building which is intended for habitation should cover a space equivalent to not less than one-fifth of the floor space of the room they serve to ventilate.

(17) *Precautions against damp.*—Provision must be made in all buildings for keeping out damp. Ordinarily a masonry plinth of 18" above the street level is the best means of doing this. A damp proof course is also desirable.

(18) *Height of walls.*—The main walls of the house shall not be less than 10 feet high. The eaves must not be less than 8 feet above the ground.

(19) *Access to backyards.*—All backyards of houses must be provided with gateways or doorways so as to give access to the scavenger and to the municipal inspecting officers.

(20) *Drains and privies.*—Every building shall be provided with such drains and privies as the Municipal Council may consider necessary. The privies must be situated at such a distance from any dwelling house or from any well, spring, tank or stream of water used or likely to be used by men for drinking or domestic purposes or for manufacturing drinks for the use of men as may be approved by the Municipal Council. Where a bath room or bathing platform is provided the floor should be impervious and provision should be made for carrying off the water to the nearest drain.

(21) *House drainage.*—Where a conservancy lane is provided, all sullage water from the house and its backyard shall be led into the drain in the conservancy lane and not into the drain in front of the house which is provided to carry off storm-water.

(22) *Cattle-sheds.*—All cattle-sheds should have impervious floors and be properly drained.

(23) *Walls or fences.*—All sites shall be enclosed by compound walls or fences of such description as the Municipal Council may prescribe.

(24) *Excavations prohibited.*—Except in so far as may be necessary for the excavation of foundation or walls or the levelling or sloping of the ground no purchaser of a house-site shall remove earth from the site for building or any other purpose so as to leave hollows in it.

(25) *Conditions of sale-deed.*—Every notice of sale of a building-site by the Municipal Council and every sale-deed in respect thereof shall embody rules (8) to (24) supra as conditions of sale which shall be binding on the transferee, his heirs, assigns and their successors, and shall also contain a condition that if the purchaser fails to complete the construction of the house as required by rule (10), his title to the site shall cease and determine and the site shall revest in the Municipal Council and the purchaser shall be entitled only to a refund of 90 per cent of the price originally paid by him to the Municipal Council. In case of a breach of any of the rules (11) to (24) the Council shall call upon the owner of the plot to make the necessary alterations or provision within a period of three months, in default of which the Municipal Council shall be authorized to make them itself and recover the cost from the owner.

Cases or parcels of books intended for despatch should be addressed to the Trustees of the British Museum, care of the Registrar of Books, Madras, accompanied by a letter stating the contents and requesting the Registrar to forward the cases or parcels.

Fort St. George, December 16, 1916.

No. 148.—In order to further the development of indigenous industries, the Government of India have instituted, with the sanction of the Secretary of State, a scheme of technical scholarships to provide natives of India, who are capable of taking advantage of it, with the means of studying the progress which has been made in industries and arts in the most advanced countries of the west. The scheme provides for the award of ten scholarships, and at least one of these will be available annually for each province.

Ordinarily the period for which these scholarships may be held is two years, but in special cases it may be increased to three years or reduced below two years. The value of the scholarships has been fixed at £150 sterling a year, exclusive of fees and travelling expenses, but if in any particular case this amount is found insufficient, the Government will be prepared on good grounds to consider its enhancement. The scholarships are tenable in Great Britain and, with the approval of the Secretary of State, in a foreign country.

2. The scholarships are awarded for the promotion of existing Indian industries and the development of new industries. They are not intended for the study of agriculture or for studying civil engineering, geology, law, medicine, forestry or veterinary science, for which provision already exists in India, but may be awarded for the study of electrical or mechanical engineering. Since the institution of these scholarships, eleven scholarships have been allotted to Madras—one was given in 1906 for the study of the weaving industry, one in 1907 for the study of the leather industry, one in 1908 for the study of textile chemistry as applied to the dyeing, bleaching, finishing and printing of textile fabrics, one in 1909 for the study of the chemistry of soap-making and the use of mineral oils, one in 1910 for the study of metallurgy, two during 1911, one for the study of weaving and one for the study of textile manufacture, one in 1912 for the study of electrical engineering, one in 1914 for the study of the leather goods industry, one in 1914 for the study of oiling and weaving and one in 1916 for higher electrical engineering.

3. A State technical scholarship will be awarded in this Presidency during the year 1917 for the study of one of the subjects referred to above. Candidates desirous of prosecuting their study under this scheme should submit their applications to the Director of Public Instruction so as to reach him on or before the 15th March 1917.

Applications will be considered only from persons who have already interested themselves practically in some industry and who are desirous of improving their knowledge of that industry by further training in Europe. Other things being equal, preference will be given to graduates. Applicants should specify in their applications—

(1) their age and educational qualifications,
(2) the industry which they propose to study,
(3) their connection with the industry,
(4) the extent of their practical experience in it, and
(5) the proof, if any, of their mechanical aptitude or industrial bent of mind.

4. The holder of the scholarship will not be bound by any engagement to serve the Government on the completion of his course nor will the Government be bound to employ him. He must generally depend upon his own exertions to make his living on his return to India and must not ordinarily expect to be taken into Government service. In selecting candidates the Governor in Council will be guided by considerations of capacity, character and practical interest in the subject selected and the assurance that the candidate will continue to devote himself to that industry on his return to India. No age limit is laid down for scholars. The course of study to be followed, as well as the place in which it is to be prosecuted, will be settled by the Secretary of State when a scholar arrives in England. Other conditions under which the scholarships are held are—

(1) that the candidate is a native of India as defined in section 6 of the Government of India Act, 1915, viz., "a person born and domiciled within the dominions of His Majesty in India, of parents habitually resident in India, and not established there for temporary purposes only";

(2) that he has the consent of his family (i.e., of his father or guardian) to proceed to Europe or America;

(3) that his character is good;

(4) that he has sufficient knowledge of the English language; and

(5) that he is physically fit to undergo the course of life and study that he will have to follow.

5. Selected scholars should in the first instance communicate with the Madras Students Advisory Committee in order that they may obtain advice regarding certificates, etc., and they should, when proceeding to England, take with them the originals of their certificates, testimonials and other important personal documents suggested to them by the Secretary to the Madras Students' Advisory Committee.

6. State scholars are required to proceed to England within a reasonable time from the date of their selection so as to arrive there not later than the middle of September, and to reside there for the period of their scholarship unless compelled to return sooner in consequence of ill-health. The scholarship will be payable from the date on which the scholars report their arrival in England. Selected scholars will be provided with a second-class passage to England and also with a second-class return passage if they carry out the instructions of the Secretary of State and complete the full period of residence or are compelled by sickness to return within that period.

7. The following rules have been issued by the Government of India for the guidance of Indian Government scholars in the United Kingdom:—

(1) All Government scholars are required to avail themselves of the information and advice which the Secretary for Indian Students and the Local Advisers* at University centres are in a position to give them, and to apply to the Local Adviser* for instructions as regards their studies and in any circumstances of difficulty. The Local Advisers* at Oxford, Cambridge, Manchester,

* The Secretary to the Delegacy for Oriental Studies at Oxford and the Secretary to the Inter-collegiate Committee at Cambridge are the Local Advisers at Oxford and Cambridge respectively.

Edinburgh and Glasgow have charge of Government scholars studying at those Universities. Scholars studying elsewhere will be under the charge of the Educational Adviser in London. The Adviser is the proper person to bring before the Secretary for Indian Students any matter requiring the sanction of the Secretary of State in Council

(2) Every scholar should on reaching England at once report himself to the Educational Adviser in London at 21, Cromwell Road, S.W. Accommodation for new arrivals is provided in that house. After seeing the Educational Adviser in London, and consulting with him in regard to his course of study, he should also call on the Secretary for Indian Students at the India Office.

(3) Every scholar must obey all instructions which he may receive, either through the Secretary for Indian Students or through his Local Adviser†, and must consult his Local Adviser regularly in regard to his work. No course of study will be sanctioned which does not provide for an adequate practical training. Any course which has received the sanction of the Secretary of State will not be changed without similar sanction.

(4) Every scholar must from time to time, whenever the Local Adviser requires it, submit a certificate from the proper college or university authority, or from any other authority under whom he is working, showing that his conduct and progress have been satisfactory.

(5) Every scholar must give a written undertaking that he will devote himself exclusively, during the tenure of his scholarship, to the study of the subject for which his scholarship was granted, and that he will return to India on its termination, and there continue to devote himself to the industry which he has studied. Any scholar who neglects his studies, or tries to work for any other profession concurrently, will render himself liable to forfeiture of his scholarship.

(6) Every scholar will be required to keep a concise diary, to be submitted at the end of each term to his Local Adviser, and to be forwarded through the Local Adviser† at the end of each academic year to the Secretary of State for transmission to India.

(7) Scholars will be expected to continue their studies during vacations with the exception of three weeks in each year. Vacation study should, as far as possible, take form of practical work.

(8) Plans for vacation work, accompanied by a complete estimate of any extra expenses for fees or travelling involved, should be sent in to the Local Adviser† six weeks before the end of any academic term. Scholars are not entitled to any subsistence allowance in addition to the scholarship allowance during time spent on vacation work, but a scholar who receives permission to visit the Continent may, if the Secretary of State for India in Council considers that the circumstances render it desirable, be granted a subsistence allowance calculated at such rate as the Secretary of State may decide.

(9) Subject to a due compliance with the above conditions, the scholar's allowance will be paid quarterly in advance by the India Office to the Local Adviser† under whose charge he is. It will begin from the date of the scholar's reporting his arrival in England, and the Local Adviser† will disburse it to the scholar in such instalments as convenience may indicate. Three months after the date of reporting arrival, the amount to the ensuing official quarter day* will be paid to the Local Adviser, and subsequent payments will be made in advance on or after each official quarter day. The allowance will, except in special cases, be at the rate of 150*l* a year.

(10) Every scholar is required to lodge with the Secretary for Indian Students at the India Office, London, before his arrival in England, the sum of 50*l* for initial expenses. He will have no claim to payment of any instalment of his scholarship until this deposit has been made.

(11) Charges for University and college fees, premiums for practical training, and the necessary expenses of scholars by second class, or by third class if no second be available, will, if sanctioned, be defrayed by the Secretary of State. Applications for payment of all these charges should be made through the Local Adviser†. But charges for private tuition, unless specially sanctioned, for books, instruments, hotel bills and medical attendance must be paid by the scholar himself

(12) No claim can be admitted for the payment of any expenditure unless the scholar has obtained previous sanction from the Secretary of State.

(13) The scholarship is granted in the first instance for two years, unless the Secretary of State in the exercise of his discretion sees reason to terminate it sooner. Every scholar will forfeit his scholarship who, not being disabled by illness or prevented by any other cause which the Secretary of State may consider sufficient, fails to comply with the rules here set forth. It may be terminated at any time if a scholar fails in health or conduct. It may also be extended for a third year or longer, if the Secretary of State decides that such an extension is required to complete the scholar's training.

(14) On the expiration of the scholarship a scholar is provided by the India Office with a free second-class passage to India, and he should apply for it without delay through his Local Adviser. † He is not entitled to make his own passage arrangements and to claim an allowance in lieu from the India Office. If a scholarship be forfeited, or if it be resigned before completion of its term, or if the holder of it, on completion of its term, declines to return to India when instructed to do so, the scholar will lose his claim to a free passage back to India.

NOTE.—*The figures in brackets are offered as an approximate indication of the number of days which, in a course extending over 125 lectures, might suitably be devoted to the respective periods or tendencies or thinkers enumerated. In the case of Plato, Aristotle, Descartes, Spinoza, Leibniz, Hume, Kant and Hegel, a thorough critical understanding should be aimed at of their main constructive conceptions, accompanied—at least in the case of S, Imore, H gel and, very especially, Kant—by some measure of first hand acquaintance with selections from their writings. In respect of the rest of the Syllabus no more is insisted on than such general acquaintance with the most prominent tendencies as may enable to provide an intelligible setting for the forementioned eight thinkers and to give bird's eye view of the history of philosophy in its outstanding features.*

The name of the applicant and his place of abode, together with his father's name and place of abode, shall be affixed in some conspicuous place in the Court-house of the Judge to whom the application is sent, and also in the High Court at least six weeks before the applicant is admitted to practise.

19. The High Court may call for evidence of the respectability of the applicant in any case in which it may be deemed necessary.

21. The certificate shall bear the number assigned to it in the register and shall be signed by the Registrar and forwarded to the District Judge to be delivered to the applicant.

The certificate shall be taken to authorize enrolment in the Courts specified therein. The holder can take it to any Court therein mentioned, and may, with the approval of the presiding Judge, be enrolled in such Court. The approval should not be withheld, unless the Judge is aware of circumstances which, in his judgment, affect the professional character of the applicant; and in any case in which enrolment is refused, the fact and the reasons for it should be communicated forthwith to the High Court.

Renewals.

22. Every application for the renewal of a certificate must be made through the Judge presiding in the Court in which the Pleader ordinarily practises, and, unless the High Court or a Judge thereof otherwise orders, shall be made not later than November 15th, and shall be forwarded by the District Judge to the Registrar of the High Court not later than the 30th idem. The renewed certificates shall be issued as soon as possible, and, unless the High Court or a Judge thereof otherwise orders, shall be dated January 1st of the year to which they relate.

Printing of renewed Certificates.

Renewed certificates will be issued from the High Court in printed forms, similar to those used for the original certificates. In case an applicant submits more than a single stamp paper for his renewed certificate, the paper of the highest value alone must be sent to the High Court with the words first or second grade Pleader, as the case may be, written on the back.

Pending the receipt of the renewed certificate, practitioners may continue to practise, subject to such precautions as to identification as the District Judge may think fit to prescribe.

No refund of examination fees will be granted except in cases in which the candidate shall have been declared disqualified to appear at the examination.

Refunds of admission (enrolment) fees may be granted at any time by the High Court of its own motion or on reference from a District Judge. Refunds of examination fees may be granted at any time after the candidate is declared by the Pleadership Examination Board to be ineligible for the examination.

Penalties.

NOTICE TO MARINERS.

for Presidency Port Officer.

NOTICE TO MARINERS.

No. 631.

CHINA SEA—TIENTSIN DISTRICT—GULF OF PECHILI.

Winter navigation of Taku Bar and of the Haiho; system of supplying information concerning Ice in the Gulf of Pechili.

Notice is hereby given of the following arrangements for the winter navigation of the Taku Bar and the Haiho.

GENERAL.

After the removal of the *Taku* Light-vessel, on or about the 1st December, her place will be taken by an ice-breaker to the following extent and showing lights as described hereunder.

At the commencement of the winter season, i.e., immediately after the removal of the *Taku* Light-vessel, an ice-breaker will continuously act as light-vessel so long as ice-breaking operations are not needed.

When such operations are needed, the continuous occupancy of the light-vessel's position by the ice-breaker will cease. She will, however, when possible, act as light-vessel for a few hours before the expected arrival of a steamer.

Subsequently, she will not again act continuously as a light-vessel unless it be so notified.

ICE CONDITIONS.

When ice exists, information concerning conditions will be telegraphed to Chefoo and Dairen. Vessels bound for Taku should call at one of these ports for it.

A vessel arriving off Taku, whose agent has given the necessary notice as laid down herein, will, if conditions permit, find an ice-breaker in the position of the light-vessel. The ice-master will inform the master of conditions. If the master decides to proceed, a pilot will, if desired, be placed on board from the ice-breaker. At a suitable time the ice-breaker will, if necessary, lead the way in, and, in doing so, will make such instructive signals concerning the steamer's action as the ice-master considers desirable.

It should be understood that, when the ice-master makes such a signal, the master of a following steamer is free to use his discretion as to obeying that signal so far as considerations concerning the safety of his own vessel are concerned. It would, however, be well for him to consider what would be the effect of disregarding the signal if that disregard affected the safety of a third vessel

It should be clearly understood that the harbour authority, under whose authority the ice-breakers operate, incur no responsibility in respect to accidents which may happen in the process of following an ice-breaker. A vessel accepting the services of an ice-breaker on the above conditions does so at her own risk.

Particulars.

ICE-BREAKING SIGNALS.

An ice-breaker leading the way and steamers following shall make use of the following signals:—

One short blast	means	I am altering my course to starboard.
Two short blasts	"	" " port.
Three short blasts	"	My engines are going astern.
One long blast	"	(a) Can I pass ahead of you?
	"	(b) (From an ice-breaker ahead) you are requested to pass ahead of me.
Three long blasts	"	Come on.
Five long blasts	"	Keep back.

A vessel requiring the assistance of an ice-breaker should make the following signals:—

By day.—A pennant with two balls beneath it; also a succession of one long and three short blasts on the whistle or siren.

By night.—Three lights in a vertical line one over the other not less than 6 feet apart, of which the highest and lowest are *white* and the middle one red; also a succession of one long and three short blasts on the whistle or siren.

Pilots and masters should make a special point not to call upon an ice-breaker to perform any work in connection with vessels under their charge except such as is mutually needed. The ice-breakers will otherwise be unduly hampered in the carrying out of their general routine work.

ICE-BREAKER ACTING AS LIGHT-VESSEL.

When acting as a light-vessel the ice-breaker will show—

By day.—A black ball at her masthead.

By night.—Five minutes of flashing with her search light every fifteen minutes.

During foggy or thick weather a gong will be sounded at intervals of one minute when the fog signal of a vessel in the neighbourhood, showing that she is under way, is heard.

PILOTS.

Masters are warned against the danger of taking their vessels over the Taku Bar during the winter season without a pilot.

Inward-bound vessels may obtain a pilot from the ice-breaker acting as a light-vessel.

NOTICE BY AGENTS.

Steamer agents at Tientsin should give the earliest notice possible to the Harbour Office concerning the following:—

(a) Date and time of steamer's departure from Chefoo or Dairen.

(b) Time of steamer's expected arrival off Taku.

ICE INFORMATION.

Ice telegrams, giving information of the ice conditions at Taku, Chinwangtao, and—as far as can be ascertained—in the Gulf, will be sent daily from Taku and Chinwangtao and will be posted at the Harbour Offices at Chefoo, Taku and Tientsin. They will also be sent to Dairen.

Masters of steamers are requested to co-operate in this matter by reporting the ice conditions met with to the Harbour Masters at Tientsin, Chinwangtao, and Chefoo immediately on arriving at one of these ports. Such reports will be posted.

To facilitate the making of these reports a special book of forms will be supplied on application to any of the Harbour Offices mentioned.

Masters of steamers are further requested to co-operate by making it a routine practice to signal to passing steamers the ice conditions experienced. The following special signals should be used for the purpose:—

The nature of the numbered signals is given in part III.

Part I.—Signals concerning Taku and the Gulf.

(b) By short and long flashes by a signal lamp.
(c) By a hoist of flags in which "dots" are represented by any square flag and "dashes" by any pennant.

271. Recorded Government Order No. 853, Public (Marine), dated the 11th December 1916, sanctioning, under section 74 of the Madras Port Trust Act, an estimate amounting to Rs. 2 lakhs for the wavebreaker blocks intended for deposit around the near end of the breakwater which was wrecked by the cyclone of November 22nd-23rd, and under section 75 of the same Act to the debit of the expenditure to Capital, the estimate in question having previously been approved in circulation by the Trustees and that approval being now confirmed.

272. Read and adopted letter No. G. 1615, dated the 5th December 1916, from the Chairman to Government submitting an application in the prescribed form for a loan of 5 lakhs for the repair of the damaged breakwater.

273. The Engineer-Chairman read to the Trustees his note, dated the 12th December 1916, reporting on the visit of Sir Robert Gales in connection with the damaged breakwater. He also read his note, dated the 13th December 1916, asking for a decision on the general question of the policy which should govern the works now to be undertaken for dealing with the damaged breakwater.

Three Trustees dissenting, it was resolved, subject to the sanction of Government, to adopt the third of the following three alternative courses of action :—

(a) to reconstruct the damaged breakwater on the same design as that of the structure which has failed,

(b) to be satisfied with making the remainder of the breakwater comparatively safe until after the war is over and normal conditions of working and of prices shall have returned,

275. Read a note by the Trust's Traffic Manager, supported by the Chairman, recommending, for reasons given, the remission of transit Dues amounting to Rs. 7-4-0 on a certain case of goods ex S.S. "Thongwa."

276. Recorded that, with the approval of the Board, Mr. A. Mackenzie took up his appointment as fourth Harbour Master on probation on the afternoon of the 30th November 1916, and resolved that his bill for travelling expenses from Rangoon *viâ* Calcutta to Madras, amounting to Rs. 283-15-0, be sanctioned as recommended by the Deputy Port Conservator.
